
How to install Skins ?

Posted by painan - 2007/10/16 18:12

Hello , I have a problem. How to install a Skin/skins.

When i download one i only got (filename).PNG , were to put it ?

Thx for the help :lol:

*.png is not what you are looking for (just an image file). The skin file should be called `_something.r2skin_` - get one of those, and you should be able to install by double-clicking and restart.

ok
