Events - Extended ?

Posted by Matt_UK - 2006/11/07 10:09

_____

Howdy guys.

I just wondered if there was a way I could view in my Events list, the events of that month, rather than of that week ?

Its a bit late when it only reminds me Monday morning that I am to be somewhere at 9am that day, its not much notice, and I just think it would be good to see in the events list the full months planned events.

If this can be implemented I would love to know about it.

Cheers.

Matt :)

_____

Options/Advanced/EventListShowComingEvents ##

Change that to any number you like. ## representing the number of days ahead you want to go.

hmm...i've tried it...but when i click "OK" and the number return to "7"
i've tried to type "Options/Advanced/EventListShowComingEvents 30"
but when i click ok there is always show "Options/Advanced/EventListShowComingEvents 7"

what should i do???
thanks

_____

yep, mine does the same thing
it won't let you change it to anything above or below 7
:(

_____

Try build 29.
