## Bug Report

Posted by jameshon - 2007/11/12 12:11

---

I installed for the first time the Rainlendar. On first start up, it reported that I was not able to create the ",ranilendar1.ini file. I uninstalled it and reinstalled again with identical result.

What can I do?

What operating system you have? Try to create the file (empty text file) and see if that helps.
