
Exporting Lotus Notes calendar entries to Rainlend

Posted by sdonslund - 2007/11/19 12:31

If anyone is interested, you can fetch the attached file to enable export of entries from Lotus Notes to an .ics file which can be used in Rainlendar. Nothing fancy, but not too annoying neither. <http://www.rainlendar.net/cms/images/fbfiles/files/NotesIcall.zip>

What does the beginning of your Mergics.rexx file look like? I can't get it to do anything but create a empty .ics file; it does not merge any of the .ics files I have.
