## Problem when whanging translation

Posted by ryfe - 2006/11/09 13:34

---

Hello everybody,

I use rainlendar2 on Kubuntu.

When I put in the rainlendar installation folder the french local (in the locale directory), i can choose french in the option...

... but Rainlendar always closes down and I have to launch again the application which is still in english...

Do you know how I can fix that?

Thanks et see you soon

Try build 26:

[http://www.rainlendar.net/cms/index.php?option=com\\_joomlaboard&Itemid=27&func=view&catid=7&id=392#392](http://www.rainlendar.net/cms/index.php?option=com_joomlaboard&Itemid=27&func=view&catid=7&id=392#392)

It shouldn't crash anymore when the language is changed.

Thank you, Rainy.

I'll try that ASAP and I'll make a return for everybody.

EDIT :

Rock&roll!

That Works!

Thanks, Rainy
