## Add years to birthdays... not always showing

Posted by sholmes1 - 2006/10/29 10:15

---

If you select "Add years to birthdays...", it shows the years on the Eventlist box, but not on the calendar in the Tooltip box.

I'm unable to reproduce this. The calendar's tooltip shows the year for the birthdays like the event list.

---

I included an example.

Here is an example (correct size for post) that shows the year in the Events, but not on either tooltip box. The same happens when I use Shadow4 skin.

[http://www.rainlendar.net/cms/components/com\\_joomlaboard/uploaded/images/No\\_year\\_in\\_tooltips2.jpg](http://www.rainlendar.net/cms/components/com_joomlaboard/uploaded/images/No_year_in_tooltips2.jpg)

The reason why it doesn't work in the tooltip is that the subject field is empty in your birthday events. I guess it could in this case add the year after the description field like the event list does...

I moved the info to the Summery field and now it shows the year. If it would not show a suplicate year it would be nice to have it show in both fields.

Thanks
