
Vitrum skin

Posted by Alexander - 2007/12/17 12:05

Due to numerous user requests some windows of Vitrum 2.0 skin will have week numbers.

=====

Re:Vitrum skin

Posted by zarz - 2007/12/17 12:15

But not Bimon? I really like that one! :P

=====

Re:Vitrum skin

Posted by Alexander - 2007/12/17 18:23

OK. Bimon 3.0.8 will have week numbers.

Re:Vitrum skin

Posted by Alexander - 2008/04/15 02:51

Vitrum08 1.2 (12 skins inside).

- New code for World time skin neutralizes Rainlendar time bug.
- World time skin is available for time zones -08,-05, GMT, +01, +02 (12-hour format).
- Map moves without periodical blur now (require Rainlendar 2.3.56 or later).
- Moon phase shows up without slope.
- File size of each skin and memory consumption reduced again.
- Some minor graphic improvements were made.

Re:Vitrum skin

Posted by niche99 - 2008/06/08 20:00

Latest Vitrum08 World Time skins fail to load with latest Rainlendar beta.

Error: skin has no active windows.

The simple skin loads.

Regards,
niche99

Re: Vitrum skin

Posted by Alexander - 2008/06/09 05:33

I installed all Vitrum08 skins with Rainlendar b.59 without any problems.

Re: Vitrum skin

Posted by niche99 - 2008/06/09 06:15

I am happy for you. But telling me that you've had no problems is not particularly helpful.

However, the skins with world time functionality fail to load for me. Curious that the simple skin loads.

Maybe someone knows what under what circumstances the error message is generated

ERROR: Skin has no active windows.

Regards,
niche99

Re: Vitrum skin

Posted by Alexander - 2008/06/09 08:44

There are different ways to get latest Beta (build 59).

I find no problems when build 59 was installed on build 55.

Another way may be wrong.

I am not sure that is the real reason of your problem - after incorrect beta installation Vitrum08 works good. :unsure:

Re: Vitrum skin

Posted by niche99 - 2008/06/09 11:57

On a clean, out of box, install of the stable Rainlendar version, I still get the same error. The simple skin loads but not the world clock ones.

I don't know what is going wrong.

Regards,
niche99

Re: Vitrum skin

Posted by Rainy - 2008/06/09 12:28

Can you attach the full debug log? Usually the missing windows problem is caused by some other error.

Re: Vitrum skin

Posted by niche99 - 2008/06/09 16:07

Find debug log attached as rainlendar2.zip.

Regards,
niche99 <http://www.rainlendar.net/cms/images/fbfiles/files/rainlendar2.zip>

Re:Vitrum skin

Posted by Rainy - 2008/06/15 10:41

The skin doesn't define any default windows which is the reason why it doesn't work. So, you need to click the advanced button in the skin options and activate the windows from there.

I'll see if this situation could be handled better in Rainlendar too.

Re:Vitrum skin

Posted by niche99 - 2008/06/15 11:27

Hi,

Finally got the skin to load :).

Could you make a version that has a black glass colour instead of the blue colour. I use Luna Element 5.1 Black as my desktop skin and having Vitrum match this would be great.

Very nice Rainlendar skin, by far my favourite.

Regards,
niche99

Re:Vitrum skin

Posted by Alexander - 2008/06/16 13:33

Wait next version please :)

Re:Vitrum skin

Posted by Alexander - 2008/09/06 08:49

Vitrum 3.0 released.

- New design and more clear fonts.
- Shadow shape refreshing was changed from monthly to weekly.
- One click toggle between windows.
- Year independent code for dst/standard time transitions.
- Time count header for alarms.

Black version stays in plan.

Re:Vitrum skin

Posted by niche99 - 2008/09/26 13:14

I see you have removed phases of the moon. Can you include it in the black version?

Regards,
niche99

Re:Vitrum skin

Posted by Alexander - 2008/09/26 16:29

Moon phases require the use different skin version for each year (i.e. Vitrum08, Vitrum09, etc.). New Vitrum version is universal. I think it is important property. Return of moon phases would be possible in case of support by Rainlendar two frame parameters - day of year and year without century at the same time. Let us ask Rainy: is it possible?

Re:Vitrum skin

Posted by Rainy - 2008/10/04 13:39

You could probably use a lua script to define which frame is shown in an image. I'll see if I could create an example for you.

Re:Vitrum skin

Posted by Alexander - 2008/10/05 02:33

Thank you. I hope it will work.

Re:Vitrum skin

Posted by Rainy - 2008/10/05 06:08

Here's an example skin which shows the current moon phase. It still needs some tweaking (e.g. the new phase should be calculated automatically when the day changes) but at least you can get the general idea how it works.
<http://www.rainlendar.net/cms/images/fbfiles/files/moonphase.zip>

Re:Vitrum skin

Posted by Alexander - 2008/10/05 13:36

Yes, it works good with my 48 phases. Unfortunately moon phase stay the same when date changes and needs manual refresh or restart Rainlendar. Updaterate is unuseful in this case. How to resolve this problem?

Re:Vitrum skin

Posted by Rainy - 2008/10/07 12:09

Here's a version which updates once per hour. <http://www.rainlendar.net/cms/images/fbfiles/files/moonphase-51ffb616769c11dd760af7e7e003e1cd.zip>

Re:Vitrum skin

Posted by Alexander - 2008/10/08 12:25

Thanks Rainy, it works fine! I'd fixed 0-frame bug in your code (log message "Unable to find the element "bitmap.moonphases" during new moon) and increased phase calculation accuracy. Moon phases return again in Vitrum 3.1 (coming soon).

Re:Vitrum skin

Posted by Alexander - 2008/10/11 15:51

Vitrum 3.1
Current moon phase added.

Version for Southern hemisphere users: Vitrum 3.1s

=====

Re:Vitrum skin

Posted by alanclarke - 2008/11/16 22:39

I have downloaded Rainlendar2 version 2.4 (b66) and Vitrum for Southern Hemisphere 3.1s.

I have installed them on a desktop running Vista Home Premium and a laptop running WinXP Home.

On both computers "today" is blacked out surrounded by a white box, DST on/off at top left and "Show 1/2 months" at top right do not display graphics but are blacked out.

I attach a screen print, I have drawn circles around items which do not display.

In Rainlendar Options I have "Reset All Settings" and it made no difference.

I have copied Vitrum3.1s.r2skin to vitrum3.1.zip and unzipped it. In 'dual calendar dst.xml' there is the line:-

```
today appearance layer="9" element="t"
```

I assume this controls how "today" displays, what should the values be?

http://www.rainlendar.net/cms/images/fbfiles/images/screen_print.jpg

Re:Vitrum skin

Posted by Rainy - 2008/11/17 11:05

Get build 67 of Rainlendar. The problem has been fixed in there.

=====

Re:Vitrum skin

Posted by Alexander - 2009/04/23 07:29

Black version is ready at last.

Vitrum 3.2

- Includes Blue and Black skin versions for each Hemisphere.
- Brightness of To Do marker was changed periodically. Fixed.

-
- Excess shadow of upper left button deleted.
 - Completed items accent now looks better.
- =====

Re:Vitrum skin

Posted by alanclarke - 2009/04/23 16:25

Times in 3.2 are 1 hour out, they were okay with version 3.1. I am in Australia and so I'm using "Vitrum S Blue"

I am using Rainlendar 2.5 b75

=====

Re:Vitrum skin

Posted by Alexander - 2009/04/23 16:39

Do you keep DST time off (upper left button)? Australian time is now standard.

=====

Re:Vitrum skin

Posted by alanclarke - 2009/04/23 16:50

Thank you for prompt reply.

I didn't realise that DST had to be set when a new skin is installed.
