
stretch Eventlist

Posted by Crypton - 2007/12/18 20:20

Hi People

I'm new in this forum. :-)

I've got a question to the skinning. So i want to know which parameter in the ini-file i have to change so it stretches the eventlist?

Here is a snapshot:

http://www.rainlendar.net/cms/images/fbfiles/images/Zwischenablage_2.jpg

Thanks

Frank

You need to define the resize are with EventListBitmapMargins. Just check how things are done in the other skins.
