## Editing events makes time change

Posted by fjas\_mx - 2006/11/09 21:33

---

I noticed time grows ONE hour when opening edit dialog for events.

Searched here and found Thread: "Editing events makes time & alarm change" but realized I found something different.

Couldn't replay what was described there.

Testing on various scenarios (event types) found it only happened in "Repeating tasks"... furthermore, it happens only in tasks defined at dates within <Sunlight savings time> created tasks. Changing date out of <DST> stops the time changing on edit event dialog open.

I am shure this is a bug.

Try build 26: [http://www.rainlendar.net/cms/index.php?option=com\\_joomlaboard&Itemid=27&func=view&id=392&catid=7](http://www.rainlendar.net/cms/index.php?option=com_joomlaboard&Itemid=27&func=view&id=392&catid=7)

If the problem still exists with that one too follow the instructions in the post and create a new bug report.
