## Chromophore Skin Colors

Posted by Gunslinger2 - 2008/01/03 13:09

---

Is it possible to change the Chromophore to a Black hue? if so how?

This is what I've seen so far and put in the required values but can't figure out the hue value for black....if there is one.

```
function Chromophore_ChangeHue(strHue)
  Rainlendar_SetOption("Variables/Chromophore", "Color", strHue)
  Rainlendar_Refresh()
end
```

It's not possible to change the lightness of the color with the hue so you cannot use it to get a black Chromophore. I'd have to add support for brightness (and probably contrast and gamma too) to allow that kind of color variations.

I too would like a black chromophore skin. The brightness control would be great. Either that or an uploaded black chromophore version. Cheers!

Hello,

Would it be possible to have it black? want the same as know just a black color.

How would I go about that?

Currently the only way is to edit the skin's images with a paint application. Check the Rainlendar's manual for instructions how to unpack the skin.

I did a black version of chromophore, full credit to original author. The only thing I did was desaturate it to make it look

---

black/gray. This is ONLY a black version, color switching isn't enabled.

<http://www.rainlendar.net/cms/images/fbfiles/images/screenshot-ffdbdfb1bdb367745f2ed10ea97aa3a7.png>

....and I can't upload it here because it's 341kb's & the upload limit is 200kb's...

....but now you can download it here

Hello!  
I'm a new Rainlendar's user a a new forum guest

For me the Chromophore Skin is nice.

I have only a question:

How I can change the skin colors?  
I click on the color buttons (see attached) but happen nothing:(

Someone can help me?  
Thanks  
Luciana <http://www.rainlendar.net/cms/images/fbfiles/files/Colors.zip>
