## Problem with old skin\_Dual todo list

---

so i downloaded this old (but beautiful) skin called "Calligraphy Calendar" from here

however, after installing it, for some reasons, rainlendar now has 2 todo list, but only one of them is active, while the other is blank. i suspect the problem is due to my applying this skin on v2.3

the thing is, i really like this skin, so can anyone help me with this problem? thank you very much
