
Creating new categories?

Posted by Unbeliver - 2008/01/26 18:56

Hi

I've been trying to make a few new categories but can't get it to work. I tried to just change an existing category in elements but after that Shadowskin wouldn't load...

Could someone please post one of there own categories and maybe I could figure out what I'm doing wrong...

Thanks in advance

Daniel

i've create new categorie, simply in the advanced button, in "Default categories" line, but all new categories have no icon. If you want to add icon to a categorie, you must modify the xml file of the skin.

I know hoe to make the category, that's the easy part, the part I'm having problems whit is changing colors on my new categories. It gets kinda boring when all your calendar is blue :P
