
Different Calendars

Posted by Da_Dragon555 - 2008/03/20 11:04

Hello.

Not quite sure where to put this, but eh...

Ok, I am wondering how I would go about making a different Calendar. Or if it is even possible.

By this I do not mean a seperate 12-Month Jan, Feb, etc... Calendar, but a different one altogether.

There is a game I play which has a 10-Month Calendar and, as a gag, for fun, I wanted to make a Rainlendar Calendar that corolates with it. There are the same number of days, just differing lengths of the months. Below is a File with the RealDate-GameDate Corolation.

Is there a way to do this?

http://www.rainlendar.net/cms/images/fbfiles/files/RS_Real_Correlation.txt

Unfortunately that is not possible. The date class I'm using works only with normal dates so it would have to be rewritten to support different calendaring systems.

Dang...

Well That's OK. Was worth a Shot...

Thanks Rainy.
