
Shadow4 in italian language

Posted by Mirek - 2008/03/22 07:06

Hi to everybody..sorry for my English but I'm an Italian boy..my problem is to translate the Shadow4 skin in Italian language..I tried to change images with Shadow3.1 skin but it doesn't work..is there someone who can make this skin for me?Help me pleasee..:(:(

Just download and install the language addon for the Shadow4 skin (see bottom of the language page).

You need to download and install both the language file (*.r2lang) and the skin addon (*.r2sin-addon).

If you want to modify the skins yourself all you need to do is to change the images. If you provide a link to the modified skin I can take a look what's wrong with it.
