## German translation: \"Yesterday\" and some others

Posted by adameus23 - 2008/03/25 05:10

---

Hey!

I just changed the option "Group multiday events" to true, but now there are some English words in my eventlist: "Yesterday" and "2 weeks ago", also "last week" and some others, I guess, will appear soon ;) I downloaded poEdit and looked for this phrases, but didn't find them... Can somebody help me?

Thanks, adameus23

Are you using the latest version of the German language file? It at least should have the strings translated correctly.
