
Shadow PNGs inherited wrong names

Posted by mbelu - 2006/11/11 08:41

The PNG titles of the months, weekdays, todo- and events-lists from the 'Shadow' skin inherited wrong names from my first translation. I mean, the names are:

Events-bg-Romana.png

Months-Romana.png

Todo-bg-Romana.png

Weekdays-Romana.png

instead of

Events-bg-Romanian.png

Months-Romanian.png

Todo-bg-Romanian.png

Weekdays-Romanian.png

Therefore, one only sees the english names. The files are all right, only the names have to be modified. Or to reupload the PNGs with the right names.

Tell me what to do.

I'll fix that for the next version.
