
About repeated birthday and anniversary...

Posted by sloteck - 2008/04/03 16:33

Hi, everyone.

I am a Korean

Many Asian use a Lunar date, normally old people.

So that their birthday or funeral-date is still uses by Lunar date.

That's the reason, I couldn't use a Rainlendar's repeated birthday show method.

If anyone who can make it or well known please let me know how to.

Thanks.

Unfortunately the date classes which Rainlendar uses do not support alternative calendaring systems.
