## Rainlendar 2.3 build 58

Posted by Rainy - 2008/04/27 11:09

---

Build 58 can be downloaded from here:

Windows: Rainlendar-2.3.b58.zip

Linux TAR: Rainlendar-2.3.b58.tar.bz2

Linux DEB: rainlendar2-pro\_2.3.b58-1\_i386.deb

Mac OS X (Intel): Rainlendar-2.3.b58.dmg

This is beta version! It has not been tested.

- o Weekly recurrence was created incorrectly to Outlook. Fixed.
  - o Rainlendar didn't adjust the timezone correctly for weekly recurring events. Fixed.
  - o The monitor thread ran in a busy loop if the location wasn't available. Fixed.
  - o Exceptions to Outlook appointments were read incorrectly. Fixed.
  - o Rainlendar can now automatically check for updates on startup (Options->Advanced->Check for updates).
  - o Added possibility to choose the message folder (i.e. the calendar) where the new Outlook events are stored.
  - o Outlook folders were not shown in the options. Fixed.
- =====

is it just me.. or the alarm option in mac is not working? i set up a few alarm this week, and none of the alarm window appears.

or did i set something incorrect?

thank your for the mac version though!!! :D

Check that the "Suppress alarms" isn't set to Yes in the Options->Calendars.

It works perfect but sometimes I had some issues with alarms...mainly when I created or edited event or task in Rainlendar to be saved in Outlook...but I am not sure if it is not an Outlook problem...but it does not matter, it works great...:-)

Just a little suggestion:-) Would it be possible to open Outlook task or event directly by clicking on event in Rainlendar window and not to use a rainlendar window?

---

I have seen something like that here: <http://www.carthagosoft.net/desktop.htm>
