
Skin Nano - 0.7 KB only

Posted by Alexander - 2008/04/28 07:47

New skin:

- Extra lightweight and very simple
 - Semi-transparent background
 - Built-in Events and To do section
 - Buttons for month forward/back
 - Red accent color for overdue items
-

I really really want to use this skin, but all I keep getting is an xml file that I can't figure out what to do with :(

1. Doubleclick downloaded nano2.2.r2skin file (Rainlendar confirms installation).
 2. Refresh or restart Rainlendar.
 3. Turn new skin on (right click > Options > Skins > Advanced > highlight new skin in the left list. Press -->, OK).
