Hi! Thanks for a superb tool.

I just bought a new laptop and also downloaded the "pro-package"ö

I am an "analog" guy and I can't understand how to do for getting Rainlendar synk with outlook.

Can you tell me in an easy language...

Where to click and so on..? Thanks in advance/Gunnar

Go to Options->Calendars. Click "Add...". Select "Microsoft Outlook" as the type and click through the rest of the wizard.

HI HI!!!

Thanks a lot! Simple as that :)

/Gunnar:)
