
request for help on a skin layout file

Posted by imonsei - 2008/06/10 01:46

Hey.
Is there anyone interested in helping me make a skin.
If i do the graphic work, would you do the actual work? :laugh:
That is to say, the layout of the skin described as a valid rainlendar skinfile?

I'll post a mockup later if anyone is interested.

PS.
This is actually really funny since I'm a programmer and not a graphics artist. I'm just too lazy to read the skin documentation right now. :side:
