## request for help on a skin layout file

Posted by imonsej - 2008/06/10 01:46

---

Hey.  
Is there anyone interested in helping me make a skin.  
If i do the graphic work, would you do the actual work? :laugh:  
That is to say, the layout of the skin described as a valid rainlendar skinfile?  
  
I'll post a mockup later if anyone is interested.  
  
PS.  
This is actually really funny since I'm a programmer and not a graphics artist. I'm just too lazy to read the skin documentation right now. :side:
