
How can I use another time format?

Posted by manhae99 - 2008/06/16 09:57

2008/06/16
22:46:58

or

2008/06/16
10:46:58 PM

Im making a skin looks like above.

but how can i show the time format on 2nd example?

and where is the explanation of TimeFormat setting in Help(Users manual)??
I wanna change the format 22:46:58 to 10:46:58 PM

please let me know~~~~ help me~~~

Rainlendar > Help > Index > Format Codes. You can use any graphic (bitmap) sign between hours, minutes and seconds.
