
Rainlendar 2.3 build 63

Posted by Rainy - 2008/08/10 07:15

Build 63 can be downloaded from here:

Windows: Rainlendar-2.3.b63.zip

Linux TAR: Rainlendar-2.3.b63.tar.bz2

Linux DEB: rainlendar2-pro_2.3.b63-1_i386.deb

Mac OS X (Intel): Rainlendar-2.3.b63.dmg

This is beta version! It has not been tested.

- o The Rainlendar_SetItemValue() was broken. Fixed.
 - o Shadow4 widget addon didn't patch the skin.xml properly. Fixed.
 - o Missing locale folder is created automatically during language installation.
 - o Offline modifications were not saved to Google calendar. Fixed.
 - o Changing window position through the API didn't save it permanently. Fixed.
 - o Fixed a crash on exit when a second instance of Rainlendar was closed.
 - o Rainlendar sometimes crashed during refresh if a network calendar tried to show an error message. Fixed.
 - o The task times are stored as local time to Outlook.
-

Re: window position problem.
Build 63 works fine.

Alexander: You should also make this change to the Vitrum skin once the next build is released.

Rainy,

I noticed in this build I am missing some of my outlook 2003 calendar events. Really odd as I am getting some meeting requests and not others..

Not noticed this in older builds..

Rainy: Yes, updatarate attribute is very useful. Now Vitrum skin uses 5% CPU. Refresh rate once a minute will reduce this value sixty times!

ozgreg, any ideas what meetings are not shown? Are there something common between them?
