## sorting in todo list

Posted by balla - 2006/11/16 14:03

---

Hey guys! I know you can sort by either category or due date, but is it possible to sort by due date WITHIN the categories? It seems like within the categories it's sorting by alphabetical order. I would like to be able to see what's due sooner, but also be able to view by category. Thanks!!

ALso, in the calendar, if i add an event on a day where there is already an event, it seems like it always places the new event on top, no matter if the time is before or after the old event. Is there anyway of sorting that also so that the events are arranged in timely order? thanks!!

the 'to do' list has priorities that you can give each task: high, medium, low, none

i think that answers your question, maybe?

:(

Currently it's not possible to define the secondary sort order. I'll try to figure out some good solution for this.
