## Cannot create new event?

Posted by swmmng - 2006/11/16 22:30

---

Just started using Rainlendar, and while trying to create a new event, the "Ok" button to create the event is grayed out, and I can't figure out any way for it to let me finish the event!

You need to select a calendar where the event will be stored. Click on the Calendars button and choose one from the list. If the list is empty you need to create a new calendar from Options->Calendars.
