
some kinda translation

Posted by Luk@ - 2006/11/17 09:36

Hi guys
I'm new here...
Hope U'll help me :)

well, I tryed to translate rainlendar to croatian, 'cause there's slovenian, serbian and macedonian language, so I wanted to have croatian...

well...
I used serbian language (really sorry if I wasn't allowed to do that) and translated it to croatian...
but...
It doesn't work :blink:
I have to put .mo file in folder with localization...
I didn't understand that, so I put the .mo and that "catalog" in sr_YU folder...
well, I still have serbian version :S

help plz :unsure:

You need to use poEdit to convert the translated .po file to .mo. Then create a folder called "hr_HR" into the locale folder and copy the created .mo file to there.
