Hi,

I have a problem with window for Events. I don't see this window in my desktop. I used Rainlendar 2.0 and Glossy 1.2.

It is possible help me?

Thank you...:(((

you have to pay for the Pro version

don't ask for a free activation.. you know better than that

Your url is incorrect. You need to download the ics-file from Google calendar. See the help file for details how to use Google calendar with Rainlendar.

I don't know what you mean by "activation".
