## Year changes by itself

Posted by cuentame - 2006/11/17 19:12

---

I've corrected the year a few times already. After a few hours I came back and the year is set to 2008 by itself. This happened to me a few times. Any idea? Thanks.

The year is changed from the arrow keys when the window has a keyboard focus. Maybe you have accidentally changed the year while trying to do something else? Or perhaps some other application is sending keyboard events to the Rainlendar's window?

Thanks. I'll be aware of that.
