## More windows

Posted by rgoshert - 2006/11/17 23:28

---

I'm new so please excuse me if this is already possible. I would like the ability to add more windows beyond ToDo and Events. I like a box to just drop quick reminders and passing thoughts. Just an empty box where I can put text. Thanks

i think it's called notepad  
right click on your desktop, select 'new', then select 'text document'

check this out:  
<http://atnotes.free.fr/>

it's pretty much exactly what you described

Thank you that is what I am looking for. I guess my purpose for posting it however was to have that type of "post-it note" window available in Rainlendar. Thank you for your suggestion I will try using that program if it can't be integrated into the program.
