## horizontal skin

Posted by roflcakes22 - 2008/09/11 15:59

---

Hi there,

I'm using Rainlendar 2.4 Pro (registered) and I was looking for a nice horizontal skin, which is pretty much transparent. I saw one in the skins section by an author called "enecao" but all of the description and FAQ was in Spanish (i'm English) ... I downloaded the .zip file, but didn't find an .r2skin file, just an ini and some png files ... i extracted these to the Skins directory, restarted Rainlendar but the new skin wouldnt appear in the list. I also renamed the .zip file to .r2skin but stil didnt appear

So I guess i'm asking if anyone knows of a good transparent horizontal skin that works with 2.4 for sure?

Thanks!  
James

Try these several horizontal skins

<http://browse.deviantart.com/customization/skins/calendars/rainlendar/#order=9&q=horizontal>

I'm also messing around with this and I'll get back here as soon as I've manage to install them

enecao's skin is the old type of skin, just unzip it to a subfolder in Rainlendar's skinfolder.
