
Single license on two computers?

Posted by monsta coty scott - 2006/11/18 12:52

I wasn't able to find this question in the FAQ or Forum, so hopefully it's not a repeat.

I plan on using Rainlendar on my desktop PC and then also having it on my laptop for when I am out of the office. I was wondering if I should purchase two licenses up front, or can I use a single license for my two computers?

Thanks.

You can use the same license in all your computers.
