
cannot change skin.not available in menu

Posted by fairy128 - 2008/09/25 02:38

Hi you all,
maybe I have really missed something, but I can't change the skin. I used to have the rainlendar on my pc and everything was fine. I bought me a mac and now I cannot find the menu button to change the skin anymore. I have already imported the new skin-folder (Glossy) into the skin-folder of the rainlendar. Or is it not possible at all in the Lite-Version?
Can anyone help me? I love the rainlendar and I would love to keep it!
Thanx alot!

You can use skins also with the Lite version. The skins are listed in Options->Skins (or in Mac it's called Preferences) which works the same way as in PC.
