Bonjour,

Je viens d'installer et de localiser Rainlendar 2.0 en Français, mais "Shadow" reste en Anglais.  
Comment le traduire en Français ou trouver d'autres peaux en Français?  
J'ai consulté la rubrique "skins" mais je n'ais rien trouvé.  
Merci de m'aider!

Translation:

Hello, I have installed and just located Rainlendar 2.0 in French, but "Shadow" remains in English. How to translate it into French or to find other French skins? I consulted the heading "skins" but I found board nothing. Thank you to help me!
