
Rainlendar 2.4 build 66

Posted by Rainy - 2008/11/09 05:19

Build 66 can be downloaded from here:

Windows: Rainlendar-2.4.b66.zip

Linux TAR (32-bit): Rainlendar-2.4.b66-i386.tar.bz2

Linux DEB (32-bit): rainlendar2-pro_2.4.b66-1_i386.deb

Linux TAR (64-bit): Rainlendar-2.4.b66-amd64.tar.bz2

Linux DEB (64-bit): rainlendar2-pro_2.4.b66-1_amd64.deb

Mac OS X (Intel): Rainlendar-2.4.b66.dmg

This is beta version! It has not been tested.

- o It wasn't possible to remove the description from Google events. Fixed.
- o Skin settings dialog could be opened even if no window was selected. Fixed.
- o Fixed drag'n'drop for priority and status when custom secondary sorting was used.
- o The type of the proxy can be set from the advanced settings.
- o Added support for GSS-Negotiate and NTLM authentication in the network plugin.
- o The calendar showed incorrect week number for the 1st week of the year following a leap year.
- o Added Rainlendar_GetElementValue and Rainlendar_SetElementValue to the scripting API.
- o Reset all settings didn't do what it was supposed to. Fixed.
- o Automatic backups are taken also when the day changes and not only on startup.
- o Empty lines in description are not removed from the tooltips.
- o Updated 3rd party libraries.

Bug the skin (No bug with the previous beta 65) http://www.rainlendar.net/cms/images/fbfiles/images/PrtScr_capture.jpg

Edit : see the second picture taken with the 65 beta.

Have a good day http://www.rainlendar.net/cms/images/fbfiles/images/PrtScr_capture_2.jpg

Hello Rainy,

I tried this version and I found a bug that removes the scroll bars from the event and todo, list.

I am using a custom skin.

Thanks for all your work

'Yawn'

Both issues confirmed. I'll fix those.

Great!

Could you also please fix again so that the manager window remembers that I want it to open to full screen?

Also when I hover over the icon, I don't want it to display the balloon of the current events. I have it unchecked in the options but it persists.

Also if I close the manager window before closing an even/todo window then when I close that event/todo window the program again crashes.

Also I thought you showed me a way to have a todo item displayed in the event list in the same manner that I could hide an item from any other list or calender. If not that would be great if an item in the todo list needed to be done at a certain day an time then to have it appears in the event list when it has a due date/time declares then that would really be super!

Thank you so very much!

The network calendar issues are persisting for me. I cannot for the life of me clear the alarm for Remembrance Day on Nov 11. Rainlendar keeps crashing when I try to dismiss it.
