
Transparency

Posted by Widi - 2006/10/28 17:07

Hi!

First of all: Rainlendar v2.0 is great! Even though I've got a little problem with the new ToDo-list: I couldn't yet reconstruct the possibility to write the tasks on more than one line. That wouldn't be that bad, but on a mouse-over (to see the whole task), it's pretty difficult to read the balloon help because the text on the background shines trough! Did I overlook a setting to fix that?

Greetings
Widi

P.S.Thanks a lot for your tool! I use Rainlendar since v0.2 and it's one of my favorite programs!!

Enable Options->Advanced->ShowFullToDoSummary

The tooltip background is an image so the transparency cannot be changed with any setting. I'll make it darker for the next version.
