## Rainlendar 2.4 build 67

Posted by Rainy - 2008/11/16 12:14

---

Build 67 can be downloaded from here:

Windows: Rainlendar-2.4.b67.zip

Linux TAR (32-bit): Rainlendar-2.4.b67-i386.tar.bz2

Linux DEB (32-bit): rainlendar2-pro\_2.4.b67-1\_i386.deb

Linux TAR (64-bit): Rainlendar-2.4.b67-amd64.tar.bz2

Linux DEB (64-bit): rainlendar2-pro\_2.4.b67-1\_amd64.deb

Mac OS X (Intel): Rainlendar-2.4.b67.dmg

This is beta version! It has not been tested.

- o Installing Rainlendar to a folder with '#'-char in path should work now.
- o Keywords didn't work as expected when a date was added to them. Fixed.
- o File monitoring is supported in Linux and Mac now too.
- o Busy status was set always to free when an Outlook event was edited. Fixed.
- o Added duplicate and up/down buttons for the calendars in the options dialog.
- o Fixed a crash if event/todo editor was opened from the Manager and the Manager was closed.
- o Alarms for weekly event were not triggered on correct day if the local time was on different day than UTC. Fixed.

Thank You Rainy,

The fixes took. :cheer:

I have a new problem that appeared a couple of betas ago. Default template setting for Todo list lost with each new install. The saved template is still there, just None is now selected. :ohmy:

Also you created a duplicate calendar button in the options. Could you please make a duplicate item in the menu for the event/todo lists and the manager which first prompts to save the current event/todo item then allow user to make modifications requiring a name change? :)

Also the manager window won't open to max when you reopen it. :dry:

I realize this is probably not in the right place, but it seems related to what was done in this beta.

Thank you again

New versions/installs shouldn't make any changes to the settings so I'm not sure what could cause such. Have you noticed that anything else changes or is the todo template setting the only one?

I'll see what I can do about the other things.

It this point that is the only consistent change that I have noticed

Thank You

Rainy,

Getting an issue where I am missing seeing events from outlook.. Please see the screenshots..

Can you send me (rainy@iki.fi) that event which isn't shown in Rainlendar? If it contains confidential information try to recreate a similar event in Outlook. Save it as "Outlook Message Format \*.msg" and make sure you save the whole recurring event and not just a single instance. And zip it before sending or otherwise gmail will strip the attachment away.

Rainy,

Sorry for the delay, I fixed the issue by deleting the .ini file. No idea why the .ini had become an issue but considering how many versions I have gone through it was not that much of a surprise that it had gotten corrupted..

Events are now 100% correct..
