
Shadow4 Sidebar doesn't centerize the month name

Posted by wandererm - 2008/11/27 07:47

I changed the sidebar width from default(165) to larger(200).

Shadow4 sidebar doesn't centerize the month name correctly,

but days numbers are put align justify.

Would this issue be fixed?

Sorry for my bad expression in poor English.

You need to increase the width (w) of the month item in the sidebar.xml so that it will be centered correctly.

...or well I guess I would have to do that since the width is available from the settings :-)

yeah, I think it should be auto adjusted with the calendar width changed.

Would this issue be modified in next release?
