
Rainmeter - One Meter with Multiple Measures?

Posted by ap0x - 2008/12/07 15:56

Hi. For those of you w/ more experience w/ rainmeter, just a quick question.

Can I put more than one measure into a meter?

I want to use one line to display The Day and Date, so i'm trying to use Text="%1, %2" type of deal in the meter.

But what syntax do i use to include multiple measures in the same meter?

Thanks!

You can define the measures with MeasureName2, MeasureName3, MeasureName4, ...
