## shadow4 skins...settings not working

Posted by Jaja - 2008/12/09 11:05

---

On my windows XP computer I was trying to change the size of the Shadow4 calendar, but when I went to Options/Skins/Settings... I clicked on Settings and a frozen grey box appeared. I had to restart my computer in order to make it go away. This happened twice. Anyone know what the problem is?

It's a bug. You need to select the window before you click the settings button.
