
translating rainlendar?

Posted by ora - 2006/11/22 03:29

what do i need to do in order to translate rainlendar into a new language? how much technical/programming skill does it require?

=====

It's relatively easy task. There is a separate application (poEdit) which can be used for the translation so no programming skills are required. The process is explained in here: http://rainlendar.net/cms/index.php?option=com_rny_translate
