---

How do I take the icons off of the calendar? (Rainlendar2)

You would have to edit the skin and remove the icons from the category appearances (deleting the files might work too). You can find instructions how to edit the skin from the help file.

OK, I'm an old, forgetful, and ignorant noob. I tried to follow your instructions, but, I really need your step by step instructions. Also, I took you up on the Trial Pro Version, but, don't see it. Or, should I post that in a different post?

Try this:

- Rename the Shadow4.r2skin to Shadow4.zip
- Open the file by double clicking it (I assume you have Windows)
- Go to the images folder in the archive and delete the icons folder
- Rename the file back to Shadow4.r2skin

If you didn't receive the license for the TrialPay just send the details to the sales address and I'll handle it from there.
