## List of scripts available

Posted by weeks - 2009/01/09 10:07

---

Hi,

Somewhere here in the forums I ran across the .lua script that resets the calendar to the current month after x idle minutes and I love it. It got me wondering if there is a listing anywhere of all the .lua scripts available. Is there? Thanks.

There aren't many scripts made yet. If I get the wiki pages up someday I can gather the scripts to there.
