## Looking for outlook icons

Posted by drm - 2006/10/29 16:48

---

This may also to apply to the subject of icons. I have rainlendar setup to open my outlook calendar and it shows me the holidays and birthday events, etc in the monthly calendar as different colored days but I can't find anywhere where to select to show the icons(categories) for these events.

This was supported in a really old ver I had 0.22 and I hope it still is.

That would require modifications to the skin. I'll write documentation how to do that as soon as I have time.
