## new skins dont show?

Posted by jguttz - 2009/01/10 13:02

---

hello everyone. i just recently found out about rainlendar and i like it but ive tried installing skins. they do install but when i go into the skins in the settings the new skins dont show up. it just has the two default skins. why is that?

What skins did you install? And did you refresh rainlendar after installing the skins?

Installed how? You should just unpack the archives in subfolders in the Rainlendar skin-folder (and NOT sub-sub-folders). HTH B)
