
Missing words in pot-file

Posted by sausi - 2009/01/21 14:48

In my german language is under Options-Advanced-General only the english sentence Number of stored backups. Also under Options-Calendar I missing the german translation of Duplicate....

I had downloaded the language template file. But in the pot-file aren't these strings. So I can't translate this :(

Joerg

They are beta-version strings - strings added after the release of version 2.4! The .pot-file will get updated with the next stable version, then you will be able to translate those (and other) strings. B)
