## NetIn/NetOut BARs don't work - a bug or just me?

Posted by cheesecake23 - 2009/01/28 10:25

---

I can't get NetIn/NetOut network stats displayed as a bar in Rainmeter 0.14 (Windows XP SP3). I'm pretty sure my code is fine, since I easily get bars for everything else like CPU, RAM and disk space. Also, displaying network stats numerically or as a histogram works perfectly.

I also tried downloading the following configs, which all feature network bars. The themes seem fully functional in all other respects, but none of the network bars are displayed.

<http://nylons.deviantart.com/art/TUBE-Rainmeter-23351238>  
<http://nylons.deviantart.com/art/Sticky-Rainmeter-23350766>  
<http://nylons.deviantart.com/art/Rogue-Rainmeter-23079480>

What's going on? Can anyone else display network stats in bar format?

Update: My config works when I downgrade to Rainmeter 0.13, so I think the most probable explanation is that there is indeed a bug in version 0.14.

I attached the latest version of my config below (and deleted it from my post above). The network bars are at the bottom in blue & violet. <http://www.rainlendar.net/cms/images/fbfiles/files/Rainbow-0b8b93a336475273ed791d8a527d1382.ini>

I tried them all on Win-XP SP3. Same problem here in version 0.14. Doesn't work. So I think you're right about the bug in version 0.14.

```
;Autoscale=1 -> Autoscale=1
```

Remove ;

As you may have guessed from the fact that those lines were already in my config deliberately commented out, I've tried that, and it doesn't work. I prefer using NetInSpeed and NetOutSpeed (higher up under Measures) adapted to my broadband connection.

You may possibly also have noticed the post above yours stating that my config works in version 0.13, but not in version 0.14.

It must define a max value in MeasureDOWNLOAD and MeasureUPLOAD.
