
Balloon position

Posted by Jackal - 2006/11/23 13:55

I have my taskbar placed at the top of the screen (\w autohide) in Windows. When the balloon popup, it looks like this and the heading cannot be seen.

http://www.rainlendar.net/cms/components/com_joomlaboard/uploaded/images/rainlendar2_ss.JPG
right top part of screen.

I hope that there will be a new option to set the position of the balloon or the direction of which it points at.

Confirmed. Rainlendar doesn't like that the tray is outside of the screen. I'll fix that.
