
64 Bit Windows Version?

Posted by Test - 2009/02/03 03:36

Hello,

i saw there are 64bit Linux versions.
But what's about Windows, will there be a 64bit version too?

Thanks.

No, unless there is some real need for it.

It works well in Vista 64bit, even though it is not a native x64 software.

Hi

Shadow4-Languages.r2skin-addon doesn't work in Vista 64. It says "The Skin Shadow4-Languages doesn't exist"....

Thanks

I don't have 64-bit Windows so I could test this myself but does it do that also with the latest version of Rainlendar (v2.5)?
If yes, it might because you don't have write permissions to the skins folder since it's in the program files. The location of the skins will be changed in the next build so hopefully things work better after that.

Ok, i don't know why but it works now correctly (v.2.5)

Sorry and thank you ;)
