## Installation Script

Posted by Qwertqwertbo - 2009/02/05 02:11

---

I've no idea why, but when I try to install Rainmeter the script opens then closes within a fraction of a second, I managed to screen it real quick and the prompt that came up said: "This script run only on HUD.Vision installation !"

I have the Rainmeter saved under "Andrew", which is my user. I run Vista 32-bit and I also tried to run the script as an admin but to no avail.

Any help would be greatly appreciated.

What exactly are you trying to install? HUD.Vision is a 3rd party skin for Rainmeter and not the application itself. You can get the Rainmeter installer from here: <http://www.ipi.fi/~rainy/legacy.html>
